Things to Know

1. Students will need to have login accounts through Parent Access. This is how they will log in to complete assignments.

2. Teachers will need the Three-Step Process on how to Download a Course, Assign the Course to the Class, and Create Assignments. (see document)

3. CG Courses (Computer Graded) assignments will be graded and automatically placed in the GradeBook

4. Jefferson County Educational Service Center will provide unlimited training to staff and any necessary personnel. Schools can choose for us to complete an On-Site Training or a Zoom Conference.

5. JCESC has over 200 courses that have been created by Ohio teachers. We have both core and elective courses in grades K-12, in which students can earn semester or full-year credit. JCESC has both teacher-graded and computer-graded for all courses. (see course list)
