DataMap v24.0.0 Release Notes

This document is an overview of updates in DataMap v24.0.0.

Included in this release:

- Enhancements
- Resolved

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

Multiple Screens

- On the screens below, DataMap now displays state assessment records that were manually entered in StudentInformation without sub area scores:
    - **Student Roadmap**
    - **State Assessments > Summary**
    - **State Assessments > Standards**
    - **Analysis > Assessment Comparison**
    - **Analysis > Multiple Measures**

  Note: *Scores must still be imported via* ***Import > Assessment Scores****.*

Student Roadmap

- On the **Student Roadmap** in the **School Year Summary** section, the state assessments a student has taken now display the school year in which the assessment was taken next to the month (for example, “Apr 24 – 25”).

Resolved Issues

Graduation Points

- (PBSIS-29431) Previously, the **Competency Overall Status** column did not display the correct indicator that was displayed on the **Grad Points Summary** screen in StudentInformation. Now, the correct Competency Overall Status indicator displays in DataMap.

RIMPs

- (PBSIS-33008) Previously, if a RIMP had the **Status** of "Closed," the **Reading Components** tab did not display the same RIMP information to users with non-admin level security roles as it displayed to users with admin-level security roles. Now, the same information is displayed to all users on the **Reading Components** tab for a closed RIMP.

  Previously, in the **Add Additional Diagnostic Measure** window, the **Use as Dyslexia Screener Score** box only displayed when **Manual** was selected in the **How do you want to enter diagnostic measures?** field. Now, the **Use as Dyslexia Screener Score** box displays when either **DataMap** or **Manual** is selected in the **How do you want to enter diagnostic measures?** field.

DataMap v24.1.0 Release Notes

This document is an overview of updates in DataMap v24.1.0.

Included in this release:

- Enhancements
- Resolved Issues

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

Import Assessment Scores

- (PBSIS-34813) On the **Import Assessment Scores** screen when you have selected "Third Party" in the **Source** field, "Dyslexia Screener" is now available for selection in the **Assessment** field for **School Year** "2024-2025."
- (PBSIS-33003) On the **Import Assessment Scores** screen when you have selected "Third Party" in the **Source** field and "Star Renaissance (New)" in the **Assessment** field, the following columns are now imported for students who have this information for Early Literacy scores:
    - AH-Unified Scale
    - AM-Percentile Rank,
    - AN-Normal Curve Equivalent
    - AO - Grade Equivalent

  These are the same columns that are imported for Star Renaissance (New) Reading scores. On the **Student Roadmap** screen in the Reading section, "Star Renaissance (New)" scores now include the prefix "Reading" or "Early Literacy" to differentiate between the two sets of assessment scores.

Manage RIMP Codes

- In the **School Year** drop-down list, administrators can select "2024-2025" to view a list of all available RIMP codes for the 2024-2025 school year.
    - The following codes have been added for 2024-2025:
        - 152800 - Tutoring by approved vendor during the school day
        - 152805 - Tutoring by approved vendor outside of the school day

© 2025 Frontline Education

frontline education

        - 152810 - Tutoring locally approved during the school day
        - 152815 - Tutoring locally approved outside of the school day
        - 152820 - Student did not receive high-dosage tutoring
    - The following codes have been removed for 2024-2025:
        - 152755 - Interventions Designed around Leveled Texts
        - 152760 - Interventions Designed around the Three Cuing System

  By default, the previous year's RIMP Program Codes are selected for the new school year. If the district would like to change the codes for the new school year, it can do so before RIMPs are created.

RIMPs

- On the **Add RIMP** window and the **Edit Student RIMP** screen **General** tab, the **On Track Status** field no longer displays the blue flag indicator (🚩) since an entry in this field is no longer required for EMIS reporting and the field can be left blank.
- The **Parent/Guardian Communication** box has been moved from the **Edit Student RIMP** screen **General** tab to the **Edit Student RIMP** screen **Collaboration** tab.
- On the **Edit Student RIMP** screen **Reading Component** tab, the **Tutors** area has been to enable you to record a tutor for a **Program Code** as appropriate. To add a tutor, click the plus icon (⊕) to open the **Add Tutor** window. For the **How do you want to enter tutors?** field select "DataMap" to select from all active staff at the district in the **Name** field or "Manual" to type in the name of a tutor or tutoring business in the **Name** field. Select the **Type** and click **Add**.
- When you are adding an initial screening result to a RIMP, the list of approved RIMP Assessment vendors for 2024-2025 is available for selection. There are no updates to the list of approved RIMP Assessment vendors in 2024-2025.

Resolved Issues

- (PBSIS-20227) Previously, Advanced Placement (AP) exam scores were not imported from StudentInformation for all subjects. Now, scores for the following subjects import correctly from StudentInformation to DataMap:
    - Calculus BC: AB Sub-score
    - Computer Science Principles
    - Computer Science A
    - Italian Language and Culture
    - Music Aural Sub-score
    - Music Non-Aural Sub-score
    - Other AP Assessment Not Otherwise Listed
    - Physics C: Electricity and Magnetism
    - Physics C: Mechanics
    - Physics 1
    - Physics 2
    - Research
    - Seminar
    - Studio Art: 2-D Design Portfolio
    - Studio Art: 3-D Design Portfolio
    - Studio Art: Drawing Portfolio

DataMap v24.2.0 Release Notes

This document is an overview of updates in DataMap v24.2.0.

Included in this release:

- Enhancements

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

Home Screen

- On the **DataMap > Students** screen, if your search results include indicators in the **Gifted** column and then you click (**Export** icon) to export the list of matching students, there is now a column for each gifted area and specific ability area. If the student is gifted for an area, "Y" is displayed in the associated column; otherwise, the column is blank.

Import Assessment Scores

- (PBSIS-35434) For the **DIBELS 8** Import, formats have been updated for 2023/2024 and 2024/2025 school years and beyond. The **Composite Score** will display on the **Multiple Measures** screen and on the **Student Roadmap** in the **Data Points History** section under "English." All other DIBELS 8 data points will display under "Reading."

RIMPs

- When you click the **Assessment** field in the following locations, assessments in the drop-down selection list are now grouped under the headings **Additional Assessments** or **Approved Assessments**. If an assessment is on the Ohio Department of Education and Workforce (ODEW) list of approved assessments, it is listed under **Approved Assessments**. Assessments that have not been approved by ODEW are listed under **Additional Assessments**. This enables you to add scores to a RIMP for an assessment that is in addition to ODEW-approved assessments.
    - **Add Initial Screening Measure** window

© 2025 Frontline Education

frontline education

  - **Add Additional Diagnostic Measure** window
  - **Add Progress Monitoring Measure** window
- You can now delete an active RIMP for a student who has a **Reading Component** with added tutors without having to first delete any tutors on the **Reading Component** tab.
