How to delete browsing data (clear cache) in Google Chrome

Step 1: Open Google Chrome

- Launch the Google Chrome browser on your computer or mobile device.

Step 2: Access the Settings Menu

- **On a computer**: Click on the three vertical dots (menu icon) in the upper-right corner of the browser window.
- **On a mobile device**: Tap the three dots or a saved google icon in the upper-right corner of the screen.

Step 3: Go to the History Page

- **On a computer**: Hover over **"History"** in the drop-down menu and then click on **"History"** again in the sub-menu, or you can directly press Ctrl + H (Windows) or Cmd + Y (Mac).
- **On a mobile device**: Tap **"Search history"** from the menu that appears.

Step 4: Open Clear Browsing Data

- **On a computer**: On the left side of the screen, click on **"Delete browsing data"**. Alternatively, you can press `Ctrl` + `Shift` + `Delete` (Windows) or `Cmd` + `Shift` + `Delete` (Mac).
- **On a mobile device**: Tap the **"Delete"** dropdown from the History screen.

Step 5: Select the Time Range

- In the **"Delete browsing data"** window:
  - **On a computer**: Choose the time range for which you want to delete browsing data (clear the cache). To clear all cached data, select **"All time"**.
  - **On a mobile device**: Select how far back you want to delete browsing data (clear the cache), (e.g., **Delete today**, **Custom range**, **All time**).

Step 6: Choose What to Delete/Clear

- **On a computer**: Ensure that the **"Cached images and files"** option is checked. You can also check other options like **"Browsing history"** or **"Cookies and other site data"**, depending on what you want to clear.
- **On a mobile device**: Depending on which option you chose to clear; ***today, custom*** or ***all time,*** you may or may not be prompted for activity type you want deleted such as Image Search, Google Search and/or Video Search.

Step 7: Clear the Cache

- **On a computer**: Click **"Delete data"** to delete browsing data (clear the cache).
- **On a mobile device**: Tap **"Delete"** to remove the selected data.

Step 8: Wait for the Process to Complete

- Chrome will clear the selected cached data immediately. Once the process is finished, you can close the tab and continue using the browser.
