Frontline ProgressBook Parent & Student Mobile App v1.2.0 Release Notes

This document is an overview of updates in Frontline ProgressBook Parent & Student (FPPS) mobile app v1.2.0.

Updates in this release:

- General
- Reminders
- Assignments
- Dashboard

General

Student ID Number

- The **Student ID** number has been added to a student's information in the header of the app and in the list of students displayed when the down arrow (⌄) is tapped. Additionally, on the list of students, if a student does not have a saved picture, the student's initials are now displayed in place of the picture.

Reminders

- Users can now set reminders for a student's upcoming assignments and/or homework. When a user has scheduled a reminder for an assignment, the system will send a push notification at the selected time. The notification will include the assignment name and due date in a standardized message format.
- Users can set reminders from the following locations:
    - From the **Assignments > Assignment Details** screen when users view Assignment Details from the **Dashboard > Grades** screen.

      Note: *The **Assignment Details** screen can be accessed from the **Assignments > Assignments** tab or from the **Dashboard > Grades** tab, when users tap a class to display the **Class Assignments** tab.*
    - From the **Assignments > Posted Homework** tab.

  On these screens, the assignment notification toggle (🔔 ⬭) has been added to the right of the assignment name. To set a notification, users tap the toggle to display the **Schedule Alert** box where they select the **Date** and **Time** they want to receive the notification, then click **Save**. The **Schedule Alert** box closes and the assignment notification toggle is green to indicate the reminder is set (🔔 ⬬).
- At the scheduled time for the alert, users receive the push notification on their mobile device.
    - When a user taps an assignment reminder notification, the app navigates the user to the **Assignment Details** screen for the corresponding assignment.

    - If the user is not authenticated, the app will require login first and then continue to the **Assignment Details** screen after successful authentication.
- The app menu now includes the **Reminders** option. Users can view all their set reminders by tapping **Reminders** on the menu.
    - Reminders are grouped by **Assignments** (for reminders set from the **Assignment Details** screen) and **Homework** (for reminders set from the **Assignments > Posted Homework** tab).
    - Users can disable their reminders from the **Reminders** screen.
    - If the time/date for the reminder has passed, the reminder drops off the **Reminders** screen.

Assignments

- On the **Assignments > Assignments** tab, each assignment type is now listed in more visibly defined sections. Headings for the **Missing**, **Due**, and **Upcoming** sections are now on their own distinctively colored backgrounds and are easier for users to see.
    - “Missing” is displayed on a red background.
    - “Due” is displayed on a green background.
- On the **Assignment Details** screen, which is displayed when users tap an assignment on the Assignments tab, and on the **Assignments > Posted Homework** tab, section headings are now distinguished by a rule line to the left of the heading, and under each heading, items are listed more visibly defined sections.

Dashboard

- On the **Dashboard > Grades** tab, each class is now listed in more visibly defined sections.
