Frontline Identity Release Notes

Release Date: July 3, 2026

This release brings new capabilities to invitations and administration along with a range of fixes and improvements to make everyday tasks smoother and more reliable.

What's New

Invitations

- **Invitation emails now show who sent them.** Invitation email messages now include the name of the organization that sent it so that recipients can immediately recognize who invited them.

Fixes & Improvements

- **Account merging.** The "Merge now" option in Account Settings now works as expected, and merged accounts display correctly across organizations without duplicate users or missing email addresses.
- **Password reset.** A bug was addressed where the password reset action in Advanced Admin was not consistently sending an email message.

Coming Soon

Administration

- **Provision a subset of organizations and roles.** Consortia Administrators will be able to provision a specific subset of organizations and roles to a user instead of all-or-nothing access. This makes it easier to scope access to only the organizations for which a given administrator is responsible.

  Note: *This update will be available on the evening of July 10, 2026.*
