DataMap v25.1.1 Release Notes

This document is an overview of updates in DataMap v25.1.1.

Included in this release:

- Resolved Issues

Resolved Issues

Import Assessment Scores

- (PBSIS-41851) The import format for the **DIBELS Amplify – PM** assessment has been updated to remove **Middle Name** and **Score Change** from the mapping. The import format now matches changes made by the DIBELS assessment provider to their export format.
- (PBSIS-41912) Previously, scores for the **STAR – PM** assessment and District Assessments could be successfully imported on the **Import Assessment Scores** screen, but the imported scores did not display on the **Student Roadmap** or **Multiple Measures** screen. Now, when **STAR – PM** assessment or District Assessment scores are imported, users on the **Student Roadmap** or on the **Multiple Measures** screen can successfully view a student's score.

  Note: *To view **STAR – PM** scores on the **Student Roadmap**, select "English" in the "Data Point History" section. On the **Multiple Measures** screen, select "English/Reading/Writing" in the **Subject** field and "STAR – PM" in the **Third-Party Assessments** field.*

GradeBook v25.1.1 Release Notes

This document is an overview of updates in GradeBook v25.1.1.

Included in this release:

- Resolved Issue

Resolved Issue

Teachers

Lesson Plans

- (PBSIS-41839) Previously, text did not display correctly on the **Lesson Plans**, **Details** tab for lesson plans that were created prior to the updated Lesson Plan functionality in GradeBook v25.1.0. The lesson plan text populated the **Summary** instead of the **Text Editor**, and for longer lesson plans, the complete text did not display. Now, this has been corrected:
    - Text for lesson plans created prior to v25.1.0 populates the **Text Editor** field.
    - The **Summary** field is blank, and teachers can complete this optional field if they wish.
    - All lesson plan text displays in the **Text Editor**, regardless of the length of the lesson plan.

ProgressBook End-User Requirements

The following tables list the supported software versions for ProgressBook end users. The ProgressBook Suite has been tested successfully using these product and version configurations. Other configurations may function without issue; however, these are the versions actively tested and supported in the ProgressBook Suite.

Operating System	Browser	Adobe Acrobat Reader
Apple		
macOS v12.6 "Monterey"	Safari v16.x	DC
Microsoft		
Windows 10	Google Chrome (latest)[1]	DC

[1] *Due to the rapid release cycle of this browser, the ProgressBook Suite is tested with the latest public released version of Chrome just before the ProgressBook Suite release.*

Additional Configurations Supported by ParentAccess

Operating System	Browser
Apple	
iOS 12	Safari

Pop-up Blockers

ProgressBook displays documents and informational messages in pop-up windows. Pop-up blockers must be disabled in your browser for ProgressBook to function properly. Check your system settings to enable pop-ups for the ProgressBook Suite websites.

Browser Extensions and Add-Ons

Some browser extensions or add-ons for the supported operating systems may cause issues with the ProgressBook Suite. If you feel you have found a specific extension or add-on that causes issues, please enter a ticket so ProgressBook can investigate the issue.
