CentralAdmin v25.2.0 Release Notes

This document is an overview of updates in CentralAdmin v25.2.0.

Included in this release:

- Frontline Platform

Related CentralAdmin documentation is available on the ITC Support Portal:
https://frontline-ohsis.atlassian.net/wiki/spaces/ISP/overview

Frontline Platform

In-App Survey

For users who authenticate into the ProgressBook suite using Frontline Passport or another SSO, the CentralAdmin application now includes a short, in-app survey that may appear occasionally for randomly selected users. The survey is optional and helps us better understand your experience so we can continue improving the product.

DataMap v25.2.0 Release Notes

This document is an overview of updates in DataMap v25.2.0.

Included in this release:

- Enhancements
- Resolved Issue
- Frontline Platform

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

Home Screen

- On the **DataMap > Students** screen, the **Counselor** filter has been added to enable you to filter the screen to show only those students assigned to the selected counselor for the selected year in context.

Graduation Summary

- On the **Graduation Summary** screen, the **Counselor** filter has been added to enable you to filter the screen to show only those students assigned to the selected counselor for the selected year in context.

Import Assessments

- (PBSIS-41098) For the **DIBELS 8** assessment, the import process has been updated to match the following changes to the file for FY24 and forward:
    - The name of the "Client Date" column has been updated to "Device Date."
    - The "Middle Name" column has been removed.

© 2026 Frontline Education

Interventions

- Print output for an intervention now includes the "Attachments" section and will list any saved attachments file names in the order they are listed on the **Edit Student Interventions** screen, **Attachments** tab.

RIMPs

- On the following screens, all RIMP codes available for selection are listed in numeric order:
  - **Admin > Manage RIMP Codes**
  - **Interventions > RIMPs > Edit Student RIMPs** on the **Reading Component** tab in the **Program Code** field
  - **Interventions > RIMPs** in the **Program Code** field of the **Add RIMP** window
- Printed output for a RIMP now includes the student's **DOB** (Date of Birth).

Student Roadmap

- On the **Student Roadmap** screen, performance has been improved in the "State Assessment History" and "Data Points History" sections, and results for selections now load more quickly.

Resolved Issue

Import Assessment Scores

- (SOSCS-958) Previously, to avoid an error, users had to update the measure names in the import file for the **DIBELS Amplify – PM** assessment to match changes the vendor made to the measure names. Now, the measure names in the import file have been updated to match the vendor changes, and this will no longer generate an error message.

Student Roadmap

- (PBSIS-41169) Previously, if a district trust had been set up between a district and a JVS or district compact, users on the **Student Roadmap** did not see the (handshake) icon that indicates when they are viewing home school data. Now, when there is a district trust, the (handshake) icon is displayed to indicate home school data for assessments, interventions, and RIMPs from the **Student Roadmap** screen for the students they share.

GradeBook v25.2.0 Release Notes

This document is an overview of updates in GradeBook v25.2.0.

Included in this release:

- Enhancements
- Resolved Issues
- Frontline Platform

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

Administrators

School Features

- The **Require Paper Copy** tab has been added to the **School Feature Setup** screen to enable you to select whether all students at a school are required to receive a paper copy when their final report card is run.

  By default, the **Require Paper Copy?** checkbox is not selected, which means that a paper copy is only required for the individual students who have the **Requires Paper Copy of Report Card** checkbox selected in StudentInformation. To require that all students at the school receive a paper copy of their final report card, select the **Require Paper Copy?** checkbox.

  Notes:

  - *You can use the checkbox in the **Require Paper Copy?** header to quickly select the **Require Paper Copy?** checkbox for each school listed.*
  - *To display inactive schools on the tab, select the **Show Inactive School(s)** checkbox.*
  - *The **Requires Paper Copy of Report Card** checkbox is selected for an individual student on the **Edit Student Profile** screen **Additional** tab in StudentInformation.*

© 2026 Frontline Education

frontline education

Principals

View Saved Report Cards

- If the **Require Paper Copy?** checkbox is selected for the principal's school on the **School Feature Setup** screen, **Require Paper Copy** tab, as described above, then when the principal finalizes report cards on the **Saved Report Cards** screen, **Final** tab, the "View Print File" PDF that is generated includes report cards for all students, even those for whom the **Requires Paper Copy of Report Card** checkbox has been not selected in StudentInformation.

Teachers

Attendance

- On the **Daily Attendance** screen and the **Period Attendance** screen, the message that attendance has not been taken has been relocated from above the list of students to next to the **Save** button, at the upper right corner of the screen. This message is now displayed in white text on an orange background for more visual prominence. This and other small User Interface updates improve the spacing and layout of the screens. The functionality of these screens has not changed.

ITC-Level

Report Cards

- Once a report card is finalized and sent to the vault, the .PDF is now removed from the district database to free up space. From that point on, that report card will be read from the vault, whether the user is in GradeBook or ParentAccess.

Resolved Issues

Administrators

Absence Types

- (PBSIS-40890) Previously, if an absence type was created in StudentInformation with a hyphen (-) in the code, users in GradeBook on the **Absence Types** screen received an error when they tried to edit any absence type on the screen and clicked **Save**. Now, absence types that include a hyphen or a space in the code do not generate an error on the **Absence Types** screen when users click **Save**.

Report Card Builder

- Previously, if a report card was set up to include imported assessment scores from DataMap, the mapping configuration on the **DataMap** tab could be incorrectly applied to other report cards that included imported assessment scores from DataMap when the other report cards were run. Now, this has been corrected, and assessment scores from DataMap map correctly to the appropriate report card.

ParentAccess v25.2.0 Release Notes

This document is an overview of updates in ParentAccess v25.2.0.

Included in this release:

- Enhancement
    - ParentAccess Web

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and click **?** (Help icon) in the top-right on any screen.

Enhancement

ParentAccess Web

- Contacts who are designated as Legal Guardians in StudentInformation can now view the **Fees** screen in addition to the student's Primary Contact.

© 2026 Frontline Education

ParentAccess Mobile API v25.2.0 Release Notes

This document is an overview of updates in the ParentAccess Mobile API v25.2.0.

Included in this release:

- Enhancement

Enhancement

- For the **ParentAccess Mobile API**, the minimum required API version has been updated to version 4. After this version of the MobileAPI is deployed, users will either automatically update their mobile app, or they will be notified that they need to update once they open the Frontline ProgressBook Parent & Student (FPPS) mobile app.

© 2026 Frontline Education

StudentInformation v25.2.0 Release Notes

This document is an overview of updates in StudentInformation v25.2.0.

Included in this release:

- Enhancements
  - StudentInformation
  - Reporting
  - StateReporting
  - ITC-Level
- Resolved Issues
  - StudentInformation
  - Reporting
  - StateReporting
  - ITC-Level
- Frontline Platform

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

StudentInformation

Account Maintenance

- On the **View Accounts > Add/Edit Account** screen or the **View/Edit Staff Member** screen, if you are editing a user record and you are on the **Account** tab when the person in context does not have an account or you are on the **Staff** tab when the person in context does not have a staff record and you have searched to locate any potential matches, if you click **Link** to link the person in context to the match, the employee's personal email address and district email address are now linked as described below:
  - The employee's personal email address associated with their Frontline Platform account displays in the **Contact** field of the **At a Glance** panel and in the **Email Address** field on the **Personal** tab.
  - The employee's district email address displays in the **Email Address** field on the **Staff** tab. If the employee has staff records at multiple districts, the **Email Address** field on the **Staff** tab displays the email address for the district in context.

© 2026 Frontline Education

frontline education

The **Link** button is not available on the **Account** tab when the person in context has a staff record at the district but no account and entries in the search fields have located potential matches for accounts at another district. In this scenario, the following message is displayed:
"This account has staff in other districts. Link this staff from the account instead."

- On the **View Roles > Add/Edit Roles** screen, when you click **Edit Resource Permissions**, the **Edit Permissions** screen, **Reports** tab now includes the **Report Folder** of "Teacher" with the subfolder "Teacher (Admin)" to enable an admin to add the "Teacher" resource permission to a security role for new GradeBook reports in the New Report Designer.

  On the **Security > View Roles** screen, the following preset Reporting roles have been added that grant access to the "Teacher" Report folder:

  - "AH – Teacher Admin Viewer" has "View" enabled for the "Teacher" Report folder and the "Teacher (Admin)" subfolder.
  - "AH – Teacher Viewer" has "View" enabled for the "Teacher" Report folder.

  Note: *The Teacher Report Folder is only compatible with the New Report Designer. Districts that have not converted to the New Report Designer cannot utilize this resource.*

My Account

- On the **My Account > Ad Hoc Memberships** screen, the **Social Security** field has been removed from the **General Info** tab.

Advanced Search

- On the **Advanced Student Search** screen, **General** tab and **Search All Years** tab, the **Social Security** field has been removed.

District Options

- The **District Options** screen has the following updates:
  - The name of the **Graduation Points Service** section has been updated to **Graduation Summary Service**.
  - The **Special Education Program** section is no longer used and has been removed.

EZ Query > Reports

- On the **SIS Student Search** screen, the following fields have been removed:
  - The **Social Security** field has been removed from the **Filter Criteria** tab, **Students** subtab.
  - The **SSN** checkbox has been removed from the **Field Selection** tab, **Students** subtab.

© 2026 Frontline Education

Graduation Tracking

- On the **Graduation Summary** screen, the requirement for **Biology (BIOL)** showing as **Met** on the **Required State Assessments** screen has been updated to only show as **Met** if the student has taken the Biology EOC exam even if the student has AP, IB, or CCP work. This update is per an email message from the Office of Graduate Success. For **Government (GOVM)** and **History (HIST)**, students can still use AP, IB, or CCP work in place of those EOC assessments, so these areas have not been updated.
- (PBSIS-41285) On the **Graduation Summary** screen under **Credit Requirement**, a student's **Financial Literacy** requirement now displays as "Exempt" if the student has the new membership code "520215 – Exempt from financial literacy requirement per board policy" assigned. If the student is Exempt and you click **View**, the **Financial Literacy Credits** screen also displays "Exempt" and "No earnable credits" displays in the **Current Total Credits Earned** field.

  Note: *For more information about the new membership code, see "Student Memberships."*

Import / Export

- For the **Home School Import** process and the **Home School Export** process, if **Course History** is being imported or exported, the **GPA Add-on Level** and **Is Honor Course** fields are now included in the import and export processes.

New School Year Script

Summer School Range

- In the New School Year Script, the summer year range is now May 15th through August 15th. Previously, the range was June 1st through July 31st. Dates in the updated range can be selected in the **Calendar Wizard** for Summer Year 2026.

Student Course Request Application (Public Course Request Module)

- In the **Student Course Request** application (also called the **Public Course Request** module), the "Status" column has been removed from the **Course Requests** screen. When public users (students or guardians) add course requests and click **Review Requests**, the **Submit** button is no longer displayed, and in StudentInformation on the **Scheduling > Requests** screen, the "Req. Status" column displays the request status as "Waiting Approval" if guardian approval is required or "Approved" if guardian approval is not required.

  References to the **Submit** button have been removed from messages on the **Course Requests** screen.

© 2026 Frontline Education

- Because the **Submit** button has been removed from the **Student Course Request** application, in StudentInformation on the **Student Course Request Application Configuration** screen, the informational message for the "None" option of the **Guardian approval required** field has been updated to remove the reference to the student submitting the requests. The message has been updated to the following:
  "None = All requests will be set to approved status."

  Note: *To access the* ***Student Course Request Application Configuration*** *screen, Public Administration users select* ***Management > School Administration > Public Administration > Application Configuration****.*

Student Memberships

- On the **Membership Members** screen and the **Edit Membership**s screen, for **Membership Group** "52 – Graduation Pathways," the code "520215 – Exempt from financial literacy requirement per board policy" has been added for FY26 and forward.

  Note: *Membership Code updates also apply to* ***School Administration > Membership Groups > Members*** *and* ***Management > Ad-Hoc Updates > Student Membership Copy.***

Student Reports

- On the **Administrative Home Room Detail (R201-A)** screen, the **Printable Columns** field no longer includes "Social Security Number" as an available selection.
- On the **Student Roster Detail (R101-A)** screen, the **Include SSN In Demographic Data** checkbox has been removed.

Withdraw Student

- On the **Withdraw Student** screen, **Building** tab, the **Current Calendar Percentages** table has been added. This table cannot be edited on the **Withdraw Student** screen and is for informational purposes only.
  - For a student enrolled at multiple buildings, the **Current Calendar Percentages** table shows the student's calendar attendance percentage at each building and displays the following warning message to alert you that you may need to reset calendar percentages when you withdraw the student from a building:
    "WARNING: When withdrawing a student from a building, the calendar percentages reset to 50/50. Please review the Calendar Percentages and after withdrawing the student, set them to the accurate values if necessary."
  - For students not enrolled at multiple buildings, the **Current Calendar Percentages** table is blank and the following message displays:
    "Student does not have any date ranges in which they attend multiple schools."

  Note: *Calendar percentages can be adjusted on the* ***Admission History > Edit Calendar Percentages*** *screen.*

© 2026 Frontline Education

Reporting

Analytics Hub

- In the report output for the **Assessment > Non-State Pre-ID > ACT Pre-ID** report and the **Assessment > Non-State Pre-ID > JVS ACT Pre-ID** report, the test code "ms" now displays in the "Test Code" column for all students.
- Report output for the **Attendance > District-Wide Membership In Hours** report now includes the "Hours OSS" and "Hours MED" columns which list the OSS and Medical hours, respectively, for each student.
- (PBSIS-41683) In the **Attendance > HB410** folder, when you select the **Absence Hours by Reporting Period** report, the **Filters** window that opens now includes **School Year** as a filter with the current school year as the default selection.
- In the **Attendance** folder, the **Chronic Absenteeism Thresholds (Hours to Date)** report has been added to enable districts to track students who are approaching or have met the 5% or 10% thresholds. The report displays the year-to-date attendance hour totals for all students. Students meeting a threshold are highlighted as follows:
    - **Yellow:** Student has an absence percentage of 5 or more.
    - **Red:** Student has an absence percentage of 10 or more.

  Notes:

    - *Run ATTUPEMIS before running this report to receive accurate details.*
    - *If the student is a Satellite Student, "Yes" is displayed in the "Satellite Student" column, and the attendance is shown as if they attended 100% of the time in the district.*

© 2026 Frontline Education

StateReporting

Assessments

- You can now select **Assessment > CLEP** to display the **College-Level Examination Program (CLEP)** screen where you can add, edit, or delete CLEP results for a selected assessment area for a student in context.

Assessment Reporting Collection (A)

- For FY26 and forward, when "Transfer Assessment Data" is selected as the **Request Type**, the **Program Selection** tab now includes the selection **Transfer – CLEP (CL)**. The file created for the **CLEP (CL)** file will be in the CSV format and not a flat file.

  The updates below have been made to the **Assessment Reporting Coll. (A)** screen to reflect that transfer files are created in the available format for the transfer, either CSV format or flat file format. References to "Flat" have been removed.

  - The header displayed above the tab has been updated from "EMIS - Create Flat Files - Select Files" to "EMIS - Create Transfer Files - Select Files."
  - In the **Transfer Type** field, the options have been updated to "File transfer" and "File transfer to Data Collector."

Calendar Reporting Collection (C)

- For **Calendar Collection Transfer**, when "Transfer Calendar Data" is selected as the **Request Type**, the options on the **Program Selection** tab in the **Transfer Type** field have been updated to "File transfer" and "File transfer to Data Collector."

CTE Industry Credential

- (PBSIS-41276) On the **CTE Industry Credentials** screen, point values have been updated for all fiscal years, and the code "CJ77 - Equipment & Engine Training Council (EETC) - Driveline-Hydraulics Certification Test" has been added.

District and Building Information

- On the **District and Building Information** screen, **District Organization Info (DN)** tab, the **Medical Group (Final Collection)** section now includes the **Overdose Reversal Drug Collection** section to enable districts to enter the number of times during the current fiscal year that an overdose reversal drug maintained by the district was used. This information is included in the file created for **Student Reporting Collection (S)** when "Transfer Student Data" is selected as the **Request Type** and "Transfer - Organization - General Information (DN)" is selected on the **Program Selection** tab.

© 2026 Frontline Education

Graduate Reporting Period (G)

- For FY26 and forward, on the **EMIS - Verify/Update and Transfer Period (G)** screen when "Transfer Assessment Data" is selected as the **Request Type**, the **Program Selection** tab now includes the selection **Transfer – CLEP (CL)**. The file created for the **CLEP (CL)** file will be in the CSV format and not a flat file.

  The updates below have been made to the **EMIS - Verify/Update and Transfer Period (G)** screen to reflect that transfer files are created in the available format for the transfer, either CSV format or flat file format. References to "Flat" have been removed.

  - The header displayed above the tab has been updated from "EMIS - Create Flat Files - Select Files" to "EMIS - Create Transfer Files - Select Files."
  - In the **Transfer Type** field, the options have been updated to "File transfer" and "File transfer to Data Collector."

Staff/Course Reporting Collection (L)

- When "Transfer Staff/Course Data" is selected as the **Request Type**, the options on the **Program Selection** tab in the **Transfer Type** field have been updated to "File transfer" and "File transfer to Data Collector."

Student Reporting Collection (S)

- For FY26 and forward, when "Transfer Student Data" is selected as the **Request Type**, the **Program Selection** tab no longer includes the selection **Student Truancy and Excessive Absence (FT)**. Additionally, in the **Transfer Type** field, the options have been updated to "File transfer" and "File transfer to Data Collector."
- The new discipline code "9-Prior Expulsion Extended Under Board Policy to Extend" has been added and is included in EMIS reporting.
- When "Verify Student Data" is selected as the **Request Type** and **Verify – Student Demographics (UNCLEMIS)** is selected on the **Program Selection** tab, UNCLEMIS Verification Code FS34E (Student cannot have withdrawal code 35 when Sent to 1 or 2 = AU, CE, CR, CT, FP, JP, JV, MR, **OR**, OS, PI, PP) has been updated to include the Sent to 1 or Sent to 2 reason of 'OR'. OR = Parent placement into home/facility upon Ohio RISE Program Recommendation.

© 2026 Frontline Education

ITC-Level

Manage School Status (Now Manage School Settings)

- The name of the **Manage School Status** screen has been updated to **Manage School Settings** and the screen has been redesigned to now have two tabs: **Status** and **Default School Year**.
    - Use the **Status** tab to edit school status settings for the year selected in the **School Year** field. The columns on the tab are described below.
        - "School/District": Lists the ITC, Districts, and Schools.
        - "Active (per selected year)": Use the toggles in this column to set the active status for the year selected in the **School Year** field for the row. If you set a District to "Active," all schools listed below it are also set to "Active," but you can change that setting for each building individually as necessary.
        - The "Default School Year" column has been added and displays the year that has been set as the default on the **Default School Year** tab for the ITC or district.
    - Use the **Default School Year** tab to set the default school year for an active individual district or at the ITC level to set the default for the entire ITC.
        - The "School/District" column lists the ITC followed by the individual districts.
        - In the "Default School Year" column for each ITC or district listed, select the school year for the default. At the ITC-level, the following warning message displays: "WARNING: Selecting the ITC will set the default year for all districts."

          Notes:

            - *The list of school years available for selection includes Summer School years.*
            - *When a school year is selected in the "Default School Year" column, the "Please Confirm this Update" message displays. Users must click **Confirm** to update the default school year for the selected ITC or district.*

  The new screen name **Manage School Settings** is also displayed on the **ITC** navigation menu, the menu selections on the **ITC Administration Pages** screen, and in the breadcrumb navigation link that displays above the screen.

© 2026 Frontline Education

Resolved Issues

StudentInformation

Account Maintenance

- (PBSIS-40428) Previously, on the **View Accounts > Add/Edit Account** screen, if the person in context did not have a staff record and you entered **999999999** in the **State Staff ID** field, the search would spin but not display any results. Now, because multiple staff members can have "999999999" as their State Staff ID, if all 9s are entered in the **State Staff ID** field, the search ignores the **State Staff ID** field. When other numbers are entered in the **State Staff ID** field, results are returned, if found; otherwise, the message, "No existing staff matches" is displayed.
- (PBSIS-22143) Previously, on the **Staff** tab for a selected user record, selections in the **Primary School** field included schools that had been deactivated on the **ITC > Manage School Status** screen. Now, only active schools are available for selection in the **Primary School** field.

  Note: *The **Staff** tab for a user record can be accessed from the **View Accounts > Add/Edit Account** screen or the **View/Edit Staff Member** screen.*

Edit Student Profile

- Previously, on the **FN – Attributes** tab, inactive buildings were available for selection in the **Majority of Attendance IRN** and **Accountability IRN** fields. Now, only active buildings are available for selection in these fields.

EZ Query > Reports

- (PBSIS-37179) Previously, on the **SIS Student Search** screen, if on the **Filter** tab, **Address & Contacts** subtab, the **Primary Contact** checkbox was selected, the output did not include any information for the primary contact if the primary contact did not have a home address saved in the system. Now, if the **Primary Contact** checkbox is selected and there is no saved home address for the primary contact, output includes all existing information for the primary contact, such as the Primary Contact email address.
- (PBSIS-7414) Previously, on the **SIS Student Search** screen, if a building was in context and on the **Filter** tab, **Ad Hoc** subtab, and you selected a public Ad-Hoc Membership group that you did not create, the report returned no students; however, the report returned students for the selected public Ad-Hoc Membership group if the district was in context. Now, if you select a public Ad-Hoc Membership group that you did not create, results return correctly when either the district or a building is in context.

Import/Export

- (PBSIS-21867) Previously, when it was imported in the **Graduation Exemptions Import**, the value "R" (Remove) returned errors with the message that "Read-only seals require a value of P or blank" for the **College-Ready Seal** and the **Honors Diploma Seal** in the "State System of Diploma Seals" section of the **Student Exemptions/Requirements** screen. Now, when the value "R" is imported for

© 2026 Frontline Education

either seal, the corresponding checkboxes will be cleared. To reapply the checkmark for system-generated earned seals, the user must either run **Check for Updated Information** or wait for the nightly job to process the update.

Reporting

Analytics Hub

- (PBSIS-36978) Previously, for the **EMIS Demographics > EMIS Attendance Hours Summary** report, the drop-down selection list for the **School Name** field in the **Filters** window did not load properly for some districts or buildings. Now this has been corrected, and the **School Name** field loads correctly.

New Report Designer

- (SOSCS-820) Previously, weekly scheduled reports were not processing correctly and were not available in the New Report Designer. Now, this has been corrected, and weekly scheduled reports process and display as expected in the New Report Designer.
- (SOSCS-889) Previously, scheduled reports created in the New Report Designer were executing an hour earlier than the set time. Now, the time zone used has been updated from "UTC-4" time to "America/New_York," and the reports process at the correct time.
- (SOSCS-879) Previously, on the **Student Absence Intervention** screen, if users had a student in context and clicked **Print Thresholds**, the generated "Attendance Threshold List by Student" report included thresholds met for all students for all years. Now, clicking **Print Threshold** only generates the "Attendance Threshold List by Student" report for the student in context.
- (SOSCS-1188) Previously, when users created a report to be a Vendor Extract and then attempted to add a report configuration on the **Vendor Extract Report Config** screen, the report was not available for selection in the **Report Name** field. Now, when a report is created as a Vendor Extract, it is available for selection on the **Vendor Extract Report Config** screen.

StateReporting

CTE Industry Credential

- (PBSIS-41327) Previously, Industry Credential codes CS61-CS95 that were added in FY25 were not copied up with the new school year script for FY26. Now, these codes have been copied to FY26 and are available for selection.

Student Reports > Gifted Area Students

- (PBSIS-5513) Previously, students were not included in the output for the **Gifted Area Students** report if they did not have a code saved in the **Local Ethnicity Category** field on their **Student Profile**. Now, students are included in the report output regardless of whether they have a saved **Local Ethnicity Category** code.

© 2026 Frontline Education

Staff/Course Reporting Collection (L)

- Previously, when **Not Run** was selected for the **Verify - EMIS Run Requests (CHECK_EMIS)** process, results included buildings for which the **Verify - Reportable Courses** process or the **Verify - Subject Codes (INVSUBJ)** process had been run. Now, buildings for which these processes have been run do not appear in the list for Not Run processes. When **Already Run** is selected for the **Verify - EMIS Run Requests (CHECK_EMIS)** process, buildings for which either process has been run correctly appear in those results.

Student Reporting Collection (S)

- (PBSIS-40411) Previously, the **Verify - Membership Programs (MEMBEMIS)** process for FY25 and FY26 did not include students with program codes in groups "52" and "80" in the downloadable **MEMBEMIS** report. Now, students with all reportable codes are included in the downloadable **MEMBEMIS** report for FY25 and FY26 and forward.

Vocational Correlated Records

- (PBSIS-41103) Previously, the **Anchor/Lab/Co-op LCC** drop-down list on the **Vocational Correlated Records** screen did not include courses with a Curriculum Code of "PS – College Credit Plus." Now, courses with the Curriculum Code of "PS – College Credit Plus" are available for selection in the **Anchor/Lab/Co-op LCC** field.

ITC-Level

New Report Designer Migration Utility

- (PBSIS-41179) The New Report Designer Migration Utility has been updated for better logging, and additional commands were added for troubleshooting purposes.

Frontline Platform

In-App Survey

For users who authenticate into the ProgressBook suite using Frontline Passport or another SSO, the StudentInformation application now includes a short, in-app survey that may appear occasionally for randomly selected users. The survey is optional and helps us better understand your experience so we can continue improving the product.

© 2026 Frontline Education

VendorLink v25.2.0 Release Notes

In this ProgressBook Suite release, this application does not contain any end-user enhancements or resolved issues; only an updated version number is observable.

VirtualClassroom v25.2.0 Release Notes

This document is an overview of updates in VirtualClassroom v25.2.0.

Included in this release:

- Resolved

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Resolved

Content

- (PBSIS-41458) Previously, when file upload functionality was updated in version 24.1.0, it was not updated on the **Content** screen, **Questions** tab for "Multiple Choice" and "Multi-Answer" questions with the "Picture" option selected in the **Style** field, and users only had the option to upload a file from **Microsoft OneDrive**. Now, for these questions, when users click **Add File** in the **Answer Key** column, a selection menu is displayed with the options **Local File**, **Google Drive**, and **Microsoft OneDrive**, and the functionality operates the same as other file uploads in VirtualClassroom.

ProgressBook End-User Requirements

The following tables list the supported software versions for ProgressBook end users. The ProgressBook Suite has been tested successfully using these product and version configurations. Other configurations may function without issue; however, these are the versions actively tested and supported in the ProgressBook Suite.

Operating System	Browser	Adobe Acrobat Reader
Apple		
macOS v12.6 “Monterey”	Safari v16.x	DC
Microsoft		
Windows 10	Google Chrome (latest)[1]	DC

[1] *Due to the rapid release cycle of this browser, the ProgressBook Suite is tested with the latest public released version of Chrome just before the ProgressBook Suite release.*

Additional Configurations Supported by ParentAccess

Operating System	Browser
Apple	
iOS 12	Safari

Pop-up Blockers

ProgressBook displays documents and informational messages in pop-up windows. Pop-up blockers must be disabled in your browser for ProgressBook to function properly. Check your system settings to enable pop-ups for the ProgressBook Suite websites.

Browser Extensions and Add-Ons

Some browser extensions or add-ons for the supported operating systems may cause issues with the ProgressBook Suite. If you feel you have found a specific extension or add-on that causes issues, please enter a ticket so ProgressBook can investigate the issue.
