StudentInformation v25.3.1 Release Notes

This document is an overview of updates in StudentInformation v25.3.1.

Included in this release:

- Resolved Issues
  - StateReporting

Resolved Issues

StateReporting

Assessment Reporting Collection (A)

- (SOSCS-2343, SOSCS-2346) Previously, Assessment transfer files in .csv format did not import into the **EMIS Data Collector** due to an extra character ("/") in **Column I (Test Date)**, an extra space in **Column N (Score Not Reported)**, and because **Column O (Score)** did not contain leading zeroes ("0") for numeric scores. Now, the formatting issues in **Column I** and **Column N** have been corrected, **Column O** has been updated to three numeric digits or one alpha character, and Assessment transfer files in .csv format can be imported into the **EMIS Data Collector**

Student Reporting Collection (S)

- (SOSCS-2348) Previously, after attendance data was removed from the **Transfer – Student Standing (FS)** file with the addition of the **Transfer - Student Detailed Attendance (FM)** file in version 25.3.0, Student Data transfer files generated fatal errors in the **EMIS Data Collector**. Now, for the **Transfer – Student Standing (FS)** file, positions 135-152 are populated with zeroes ("0"), and Student Data transfer files can be imported into the **EMIS Data Collector** without error.
- (SOSCS-2379) Previously, for the **Transfer - Student Attributes – No Date (FN)** file, field **FN110** (the "Fiscal Year Student Began 9th Grade" field) in positions 45-48 was populated with a single zero ("0") if a student did not have a saved **FY Began 9th** value on the **Edit Student Profile** screen, **FN-Attributes** tab. This generated fatal errors in the **EMIS Data Collector**. Now, if a student does not have a saved **FY Began 9th** value, **FN110** is populated with four zeroes ("0000"), and the **Transfer - Student Attributes – No Date (FN)** file can be imported into the **EMIS Data Collector** without error.

ProgressBook End-User Requirements

The following tables list the supported software versions for ProgressBook end users. The ProgressBook Suite has been tested successfully using these product and version configurations. Other configurations may function without issue; however, these are the versions actively tested and supported in the ProgressBook Suite.

Operating System	Browser	Adobe Acrobat Reader
Apple		
macOS v12.6 “Monterey”	Safari v16.x	DC
Microsoft		
Windows 10	Google Chrome (latest)[1]	DC

[1] *Due to the rapid release cycle of this browser, the ProgressBook Suite is tested with the latest public released version of Chrome just before the ProgressBook Suite release.*

Additional Configurations Supported by ParentAccess

Operating System	Browser
Apple	
iOS 12	Safari

Pop-up Blockers

ProgressBook displays documents and informational messages in pop-up windows. Pop-up blockers must be disabled in your browser for ProgressBook to function properly. Check your system settings to enable pop-ups for the ProgressBook Suite websites.

Browser Extensions and Add-Ons

Some browser extensions or add-ons for the supported operating systems may cause issues with the ProgressBook Suite. If you feel you have found a specific extension or add-on that causes issues, please enter a ticket so ProgressBook can investigate the issue.
