VirtualClassroom v24.0.0 Release Notes

This document is an overview of updates in VirtualClassroom v24.0.0.

Included in this release:

- Enhancement

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancement

Add New Resources Window

- In the **Add New Resources** window, the **Sign in with Google** button is temporarily disabled. Until the **Sign in with Google** button is available, teachers who typically use Google Drive to upload a file that students access for a course should click **Import a Local File** to upload a file from their local machine. A message is displayed in the **Add New Resources** window to alert teachers to this.

  Note: *To display the* ***Add New Resources*** *window, from the* ***Dashboard*** *of a course, click* ***Content****. Next, click the* ***Add*** *button and then click* ***File.***

VirtualClassroom v24.1.0 Release Notes

This document is an overview of updates in VirtualClassroom v24.1.0.

Included in this release:

- Enhancements

Related documentation is available in the Learning Center. To access this resource, log in to ProgressBook and select **? > Learning Center** from the banner.

Enhancements

File Uploads

- On the **Content** screen for a course, when you click **Add**, the **File** option is no longer displayed. It has been replaced by the following three options:
    - **Local File:** Select to display a standard Windows file selection window. Navigate to the location of the file on your local machine and select the file.
    - **Google Drive:** If your district has configured Google Drive integration with VirtualClassroom, select to add a file from your Google Drive. If you are not currently logged in to your Google Drive account, the **Sign In with Google** screen displays before you can proceed to select the file.
    - **Microsoft OneDrive:** If your district has configured **Microsoft OneDrive** integration with VirtualClassroom, select to add a file from your Microsoft OneDrive. If you are not currently logged in to your Microsoft OneDrive account, the **Add New Resource** window displays with the **Connect to OneDrive** button. Click **Connect to OneDrive** and log in to your Microsoft OneDrive account before proceeding to select the file.
- On multiple screens, when you click the **Add a Resource** button, a selection menu is now displayed with the options **Local File**, **Google Drive**, and **Microsoft OneDrive**. These options operate as described above. The Add a Resource button displays in the following locations:
    - On the activity **Questions** screen when you are adding a **Question**, **Section**, or **Text or Resource**
    - On the **Content** screen for a Discussion, **Settings** screen

- In the specific scenario below, students using Google Drive or Microsoft OneDrive to create a response to an Essay question for a Quiz must now make their file shareable within Google Drive or Microsoft OneDrive before they upload it to ParentAccess (for example, set the file to "Anyone on the internet with the link can edit"). This is only required when you have added the Quiz with the following settings:
    - In VirtualClassroom, the Quiz must have at least one Essay question with the **Allow Students to Upload a File** checkbox selected and for which in the **Allowed File Types** field, any file types for Google Drive or Microsoft OneDrive are selected.
    - In GradeBook, on the **Assignment Details** screen, **Main** tab for the Quiz, the **Third-party documents submitted as files?** checkbox is selected.
